About Us

CAGP

Established in 1997, CA Global Partners is a global company providing equipment management and capital recovery solutions to leaders in technology, finance, and industry.

In 2015, CAGP became the chosen asset disposal partners of Heathrow airport, which resulted in the acquisition of the redundant assets situated in the closed terminal 1.

Due to the relationships that have been formed in the aviation industry since our partnership & auctions, we are launching our new AIRPORT ASSETS brochure, which offers used aviation equipment sourced from Heathrow and beyond.

smiths detection

HI-Scan 6040aTix Heimann X-Ray

Immediate availability, fully working & serviced.

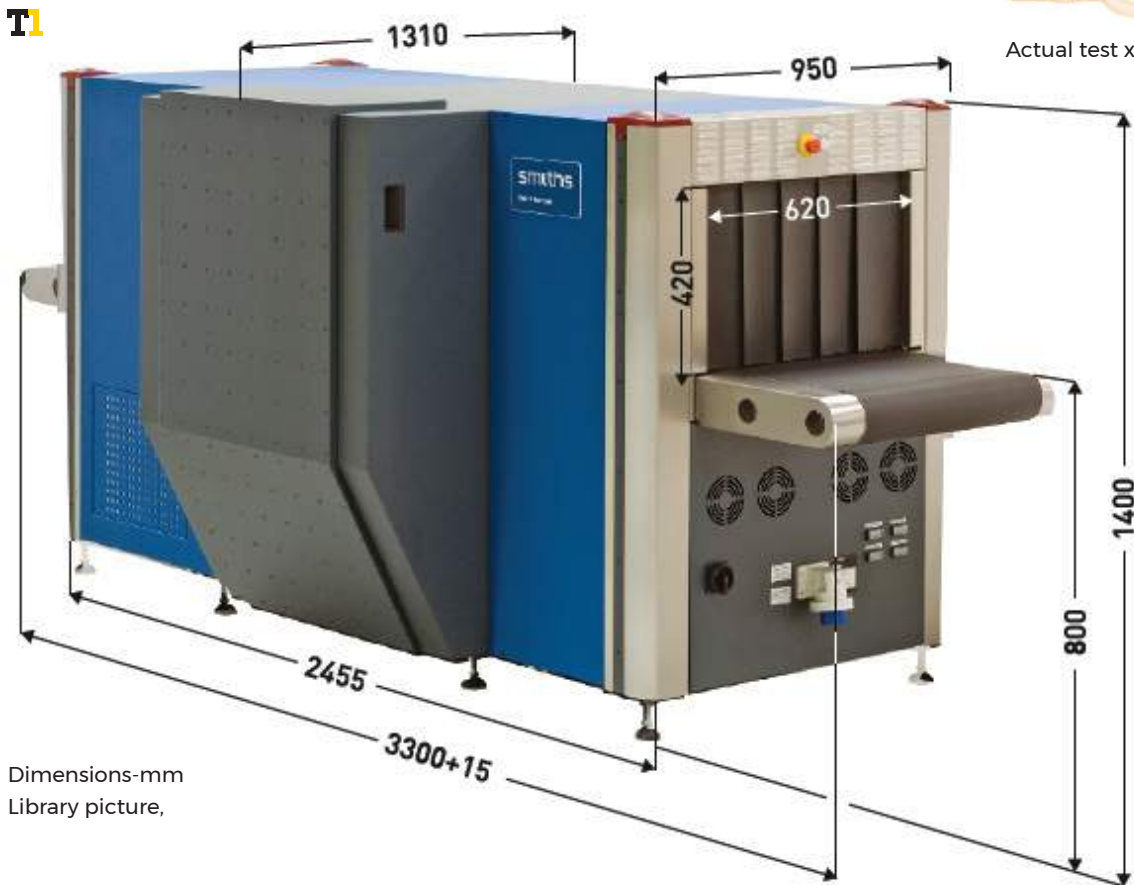

Used from

£18,000

Delivery & install options available.

Actual test x-ray image

Dimensions-mm
Library picture,

Key Features

- + Automatic detection of explosives in carry-on baggage
- + Analysis of Zeff and density using independent views
- + Maximum baggage throughput / real time evaluation
- + Proven, ergonomic operating concept is retained
- + Two high-resolution and detailed views (Dual View)

Approved as LEDS according to EU Standard 2 and 3 Type B (type upgrade available)

Approved according to EU cabin baggage standard C1 and C2

smiths detection

HI-Scan 7555si

Immediate availability, fully working & serviced.

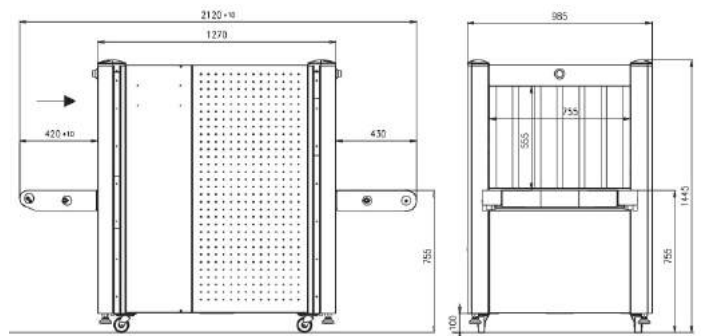

Used from

£6,000

Delivery & install options available.

Key Features

- + New X-ray generator with optimised spectrum
- + New HiTraX II system platform with extended scope
- + High resolution image display with doubled resolution of services
- + Up to 37mm steel penetration
- + Wire detectable up to AWG 41

HI-Scan 6046si

Immediate availability, fully working & serviced.

£POA

Manufactured and used for only two weeks in 2012, safe boxed storage since.

Ideal for screening at checkpoints and building entrances.

smiths detection

HI-Scan 10080 EDX-2si Heimann X-Ray Inspection System

Ideal for varied industry cargo screening, 1m x 0.8m entrance tunnel.
Immediate availability, fully working & serviced.

Used from

£14,000

Delivery & install options available.

T1

Key Features

- + Automatic detection of explosives
- + Analysis of Zeff for efficient detection at low false alarm rates
- + High belt speed, thus high throughput up to 1,800 items/h
- + EU standard 2-compliant (acc. to regulation 1448/2006)
- + Evaluation in real time
- + Specially designed for multi-level systems
- + Two high-resolution X-ray images (dual view) available for operator recheck
- + Fully integratable in automatic conveyor devices and networks for image distribution, system management, archiving and TIP

Analyst station available.

smiths detection

IONSCAN 500DT

Simultaneous explosives and narcotics trace detector.
Immediate availability, fully working & serviced.

Used from **£POA**

Key Features

- + Detection and identification in less than 8 seconds
- + Simultaneously detects and identifies explosives and narcotics
- + Large touch-screen colour display
- + Built-in printer, thermal or dot matrix printer, depending on model
- + Reusable sampling swabs
- + Approved/certified by TSA and ECAC

SABRE 4000EXV

Used from **£5,000**

Delivery & user upgrades available.

RAPISCAN/Morpho itemiser 4DX

Almost new, Latest model.

Used from **£POA**

Key Features

- + Simultaneous detection of explosive and narcotics in eight seconds
- + Non-radioactive ionization source
- + Increased usability, improved operational and detection accuracy
- + Remote monitoring capability via remote connect™
- + Push-button, schedulable automated maintenance

smiths detection

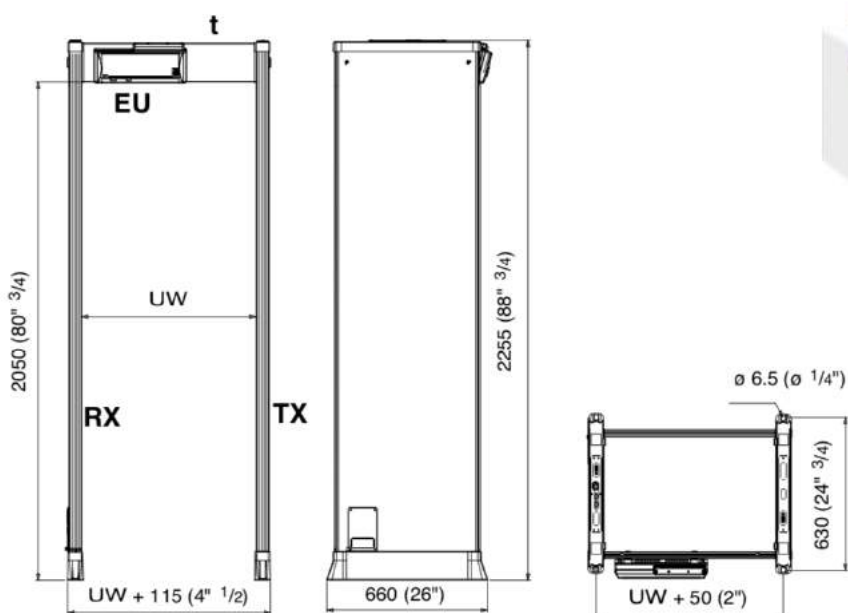

O2PN20 PTZ walkthrough

Fully serviced and working.

Used from
£2,000

Key Features

- + Precise detection of magnetic, non-magnetic and mixed alloy weapons
- + Immediate selection of International Security Standards
- + Location and display of weapons in transit in various areas
- + Maximum discrimination capacity, higher passage frequency, also with the new security standards for firearms (assembled and disassembled) and unconventional weapons
- + Extremely high immunity to electrical and mechanical interference
- + Airports and public buildings

Accessories

X-Ray compliant search trays

High quality X-ray security trays, specifically designed for high security environments where clear scans are important. Designed to stack.

Enquire for sizes.

Used from **£5** each

Security roller systems

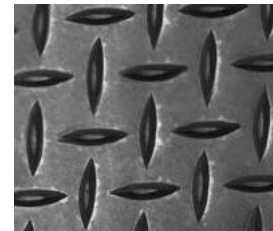

Various types available. Used. Enquire for sizes and styles.

Welfare anti fatigue matting

Enquire for sizes and styles. Used.

Operator consoles

Adjustable Smiths iLane consoles, single /dual screens available.

Used from **£850**

NEXT MONTH

SEATING and passenger management, barriers and glass partitions

L3 ProVision2 body scanners

Immediate availability, only 3 years old.

Used
£POA

Key Features

- + Transparent walls
- + Rigid construction
- + Configurable operating modes
- + Upgradeable detection software

Scanning Features

- + Automatic detection, no images presented or generated
- + Front and back generic mannequin presented side-by-side
- + Parallel screening options for increased throughput
- + Automatic system diagnostics capabilities

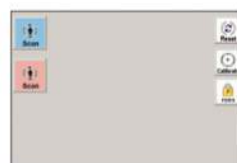

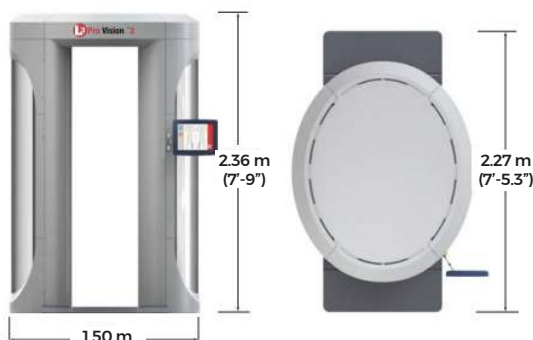

Ultimate Privacy: Image-Free Technology

The ProVision 2 boasts similar privacy protocols as walk-through metal detectors since images are not generated. Numeric scan data is analyzed by software without human intervention to determine if any threats are present. Potential areas of concern are mapped onto a generic mannequin, which is identical for everyone, and presented to the operator. Security personnel can then assess the situation. If nothing is detected, a green screen with an "OK" appears and security personnel can clear the individual.

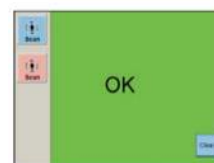

Health and Safety: Safe Radio Wave Technology

The ProVision 2's sensing mechanism is based on millimeter-wave technology using safe radio waves that pose no health and safety risks. These signals

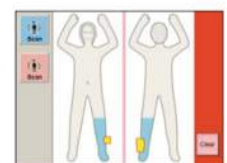

pass through most types of clothing, but do not penetrate the body. The reflected waves are captured by the system's sensors. The ProVision 2 does not use ionizing radiation, such as X-rays, and is tens of thousands of times less powerful than other commercial radio frequency devices like cell phones, wireless handsets and other standard household devices. The ProVision 2's millimeter wave technology has been extensively evaluated by regulators worldwide including the U.S. Food and Drug Administration, Health Canada and the Dutch Institute of Applied Science (TNO), and found to be safe.

The operator control panel displays scanning and other system options

An "OK" message on a green background automatically clears most passengers

Concealed items are highlighted on a generic mannequin

Introducing our service partner, RedteQ Analytical Ltd

RedteQ Analytical Ltd are a UK-based company that provide worldwide service support to many clients across the world.

We are an independent global service provider on security equipment sales, installation, servicing & repairs

The products we support are X-ray screening, Tray Return Systems, Explosives and Drug trace Detection equipment, Metal Detectors & Body Scanners..

Our quality of workmanship is of the highest class as expected for the equipment we maintain and support. We always put the customers first and adapt to their needs, we are unique in that we can be as flexible as we like to adjust anything for the customer's requirements.

RedteQ Installation, Servicing and Repairs include:

- + X-ray equipment
- + Tray Return Systems
- + Explosives/Narcotics detection equipment
- + Metal Detection

RedteQ Analytical Ltd
Alan Redpath
Senior Engineer

“ RedteQ have worked with CAGP for a number of years, successfully preparing, delivering, installing and training customers on their equipment purchased.

We believe CAGPs goal of sustainability and selling surplus equipment is the future for aviation security, why buy new when you can buy used equipment that performs the same task that the current new model provides. ”
